

## EMPLOYMENT SETTING PRACTICUM

While the preference is for students to complete their field practicum in a setting other than their employing agency, we recognize that financial and time constraints may make an employment setting practicum more realistic for some students. If the employment setting can meet certain conditions, it is possible to complete the practicum in your place of employment with the approval of the Coordinator of Field Education (MSW) and Assistant Coordinator of Field Education (BSSW). The employment setting practicum must meet certain criteria (see Employment Setting Practicum Application or BSSW/MSW Field Manual) outlined to be approved. *Interested students must request the Employment Setting Practicum Application within 24 hours of the Mandatory Field Orientation and submit the application within one week of the Mandatory Field Orientation.*
